

EDG Partners announces HealthPRO Rehabilitation's acquisition of Therapy Partners, LLC.

HealthPRO Rehabilitation, a leading rehab management company, has completed the acquisition of Therapy Partners, an Ohio based therapy provider to regional and national long term care organizations. The acquisition strengthens HealthPRO's foothold in the Midwest and supports the companies continued expansion in the region. In addition, HealthPRO benefits from Therapy Partners' strong leadership team with extensive and proven experience addressing unique needs and challenges of skilled nursing facilities.

HealthPRO Rehabilitation provides rehabilitative services to long-term care and other health services providers. The company utilizes a proprietary technology combined with a business model that decreases therapy costs, improves outcomes and strengthens regulatory compliance and documentation. A typical HealthPRO client will see a 10% to 20% improvement in earnings.

"Therapy Partners' reputation of doing what is right by putting their partners and residents first, and the creative thinking and innovating by its leadership team, is a natural fit for the HealthPRO organization" said John Heller, CEO, HealthPRO Rehabilitation. "We look forward to working with the Therapy Partners team to continue providing leading solutions and services throughout the Midwest and beyond."

EDG Partners initially invested in HealthPRO in October of 2007 along with SV Life Sciences and HealthPRO management. The company and EDG remain in acquisition mode and are seeking additional opportunities throughout the United States.
